

**CUSTOMER CONSENT TO PERMANENT DISCONNECTION
OF DISTRICT PROPANE SERVICE**

The undersigned property owner hereby requests that the Kirkwood Meadows Public Utilities District permanently disconnect the service connection to the District propane system serving the following property:

Address: _____

Assessor's Parcel No(s): _____

By making this request, I freely and voluntarily agree to comply the following terms and conditions:

- (1) If my request is approved by the District General Manager or their designee, the disconnection will be permanent and cannot be restored once the disconnection is completed.
- (2) The propane service connection will be permanently decommissioned and removed at my sole expense from the subject housing unit or other structure according to the following requirements: (a) I shall hire a contractor to excavation and expose the existing propane service facilities serving the property; (b) I then shall promptly arrange for and permit District staff to access my property to remove the propane meter and permanently disconnect the service from the propane system; and (c) after District staff disconnects the property from the propane system, I shall promptly fill in or have filled in the excavated area and restore the surface as nearly as possible to its previous condition. I also agree that all excavation and disconnection work will be performed according to the District' General Conditions and Standard Design and Construction Specifications for Propane.
- (3) If the propane service disconnection is not decommissioned timely, I will permit the District to access the property and lock off the service. This will enable the District to cease charging the propane service base rate and meter charges for my service as soon as possible. I agree to pay any final bill rendered by the District for any base rate and meter charges incurred before the date my service was terminated.
- (4) If I have rented or leased my property to another person or persons, I agree to first obtain my lessee's or tenant's consent as shown below as a condition of the District's approval of my propane service disconnection request.

By signing below, I certify that I own the above-described property and signify my full understanding of and agreement with the terms stated in this consent form.
